

## How It Works

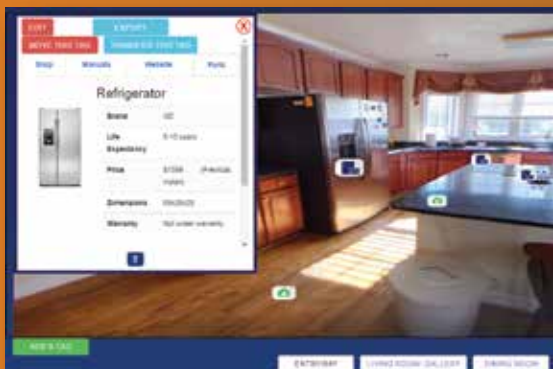

- 1 A Casa Command employee will contact you to set up an appointment to visit your home.

Within 1-2 hours we will be able to capture 360 spherical photography of each room and area of home and yard, including all highlighted features and sell points.

- 2 The imagery captured will be loaded with Tags. Tagging information can include age of appliance, life expectancy, repairs needed, service history, warranties, etc. as well as details on finishing, installs, built-ins and more!

A Casa Command profile will then be turned over to you including all the photography and data about your home.

- 3 Save money on listing fees and agent commissions by cutting out the middleman and hosting your sale with Casa Command. You can share your home with potential buyers remotely, answering any questions they may have directly through the application.

- 4 Did we mention that for a limited time our service is free? Yes, a Casa Command home profile will be completed and turned over to you at no cost. Casa Command launched in 2021 and we are looking for real user feedback. Take advantage of this limited offer and sign up today!

Be the first to utilize our unique mapping and tagging system and sell your home your way.
