

## How It Works

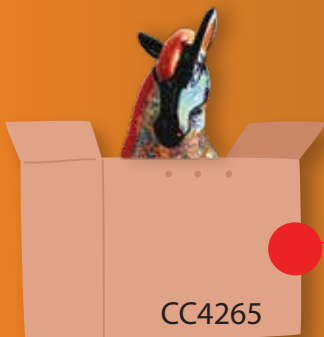

- 1 Moving is one of the most stressful things you can do - but Casa Command can help - for free, and we do all the work.

A Casa Command employee will come to your house, photograph all your items to be moved, and work with your mover to organize everything in a way that makes sure you know exactly what is in each box.

- 2 Items or grouped items tagged will be given a Unique Identification Number. This number is unique to that item and will stay with it throughout its lifetime.

Tagging identifies item type, priority, destination, fragility, and more. An image of the item is included for easy identification.

**Ceramic Horse**

**Fragile**

**Excellent Condition**

**Destination: Basement**

- 3 Save money by exporting tag list to mover for easy, accurate estimates, and the option to acquire specific insurance packages based off your inventory.

- 4 No stress, we got this handled. Sit back and watch your Casa Command app automatically update as items arrive at their new location. The Unique IDs given to each tag are scanned upon arrival, guaranteeing everything makes it on time and ends up in the correct location.

Be the first to utilize our unique mapping and tagging system and manage your home your way.
